March 28, 2023

Congressman Jim Jordan  
2056 Rayburn House Office Building  
Washington, DC 20515

Dear Mr. Jordan,

I am writing to you today in your capacity as Chairman of the Subcommittee on the Weaponization of the Federal Government. Our community rejoiced to see the formation of your committee and look forward to the findings of this long-overdue investigation.

I am the president of a support and advocacy organization for people who have experienced anomalous health incidents(AHI), also known as Havana syndrome. We are called *People Against Covert Torture and Surveillance, International* and we're based in Twentynine Palms, California. Our mission is to educate the general public about the cause and effects of Havana Syndrome attacks that are occurring not only to government employees overseas, but to everyday citizens residing in this country and the globe.

We believe that the source of these attacks, which use secret, advanced microwave and directed energy weapons technologies, to be rogue elements of the United States intelligence agencies which you have correctly identified as being involved in activities that are a clear and present danger to the American people.

Federal whistleblowers are often the targets of this abuse, however, please be advised that many innocent civilians find themselves victims as well.

We hope that your upcoming investigation will discontinue the illegal weaponization of the Intelligence agencies, as well as law enforcement, fusion centers, DHS, and the FBI against American citizens. They have invaded, ruined,

repressed, and destroyed the lives of thousands of people in this country who they are charged to protect.

*And there are hundreds of our community members that have medical doctor reports from verified neurologists and other experts, which confirm that the victim has been the subject of Havana Syndrome microwave and/or directed energy weapons attacks which have caused documented brain and/or neurological damage.*

*As you may know, in September 2022, CNN hosted an hour-long special featuring four of the world's preeminent neurologists - Doctors Sanjay Gupta, Douglas Smith, James Giordano, and James Hoffer- all of whom stated unequivocally that these documented instances of brain damage were absolutely Havana Syndrome and 100% caused by microwave and/or directed energy weapons.*

Congress validated the existence of the microwave/directed energy caused by Havana Syndrome and the need for the federal government to provide medical care for its victims when it enacted the **Helping American Victims Affected by Neurological Attacks” (HAVANA) Act of 2021 (Pub. L. 117-46)**

Then, in an Executive Order signed into law on October 7th 2022, President Joe Biden confirmed the existence of the widespread practice of defense contractors and rogue intelligence agents weaponizing the federal government to attack, harm and otherwise violate U.S. civilians' civil rights. These Executive Orders specifically cite the unlawful practice of using signals intelligence and other technological means to harm and destroy civilians and violate their privacy and other civil rights. (See, October 7, 2022, Executive Order (EO) 14086, “Enhancing Safeguards for United States Signals Intelligence Activities”).

There are potentially hundreds of thousands of victims who could come forward to share their experiences of the secret holocaust that we endure daily.

Therefore, we at PACTS, International encourage and support your investigation of the “weaponization of the federal government” particularly since we have been made aware that your committee has been briefed about our plight and you are considering how best to inform the public without inciting mass panic.

In regards to this concern, we would offer that people will only panic if faced with a life-threatening situation without a workable remedy. As congressional members,

you can however, present the public with a number of options which could mitigate mass panic or outrage .

First, there needs to be legislation against the criminal use of microwave or directed energy weapons. This would then create an office(s) or agency(ies) whereby victims could report these abuses.

Law enforcement would then be empowered to investigate, apprehend, and prosecute those individuals involved in these attacks which could also act as a deterrent to further victimization. Doctors and hospitals should also be barred from participation in illegal, non-consensual human experimentation.

We believe that If these steps were taken along with a public information presentation, they would go a long way in mitigating public outrage or fear at the awareness of the extent to which the intelligence agencies have intruded into our lives.

Our contact information is provided at the end of this letter if we could be of assistance to you in the furtherance of this investigation.

And now on behalf of myself, my board members, and the co-signers of this letter, we thank you very much for your attention to this extremely important matter.

In Peace & Liberty,  
Derrick Robinson, President
